

Finding Hope After Diagnosis

Okay, so when you were first diagnosed Morgan,
they handed me a video.

And so, this is what I saw.

Hi, I'm Julie, and I go to middle school

and I like it a lot.

My dream is that when I grow up

I want to be a veterinarian,

because I like animals

and I want to take care of them and help them.

Wow.

When I saw that I thought,

"I don't know what that is but I want to figure that out."

"How do we get that?"

I mean, if you wouldn't have seen that video

I don't think any of this would be possible.

Right.

I've heard my mom talk about this a lot,

and so for me to actually see it, it's a little different,

kind of, emotional a little bit. Whoa.

I'm sorry.

I wanted this for you. And I hoped that you wanted it too.

- I mean, look at me now!

- I know! Look at you now.

I'm just, I'm thankful. I'm really grateful that my mom, you know,
went through the hard work and the hard decision of making that for me.
I'm glad that she made that decision for both of us.
Whoa. Ha.
